SUMMARY

SQA Engineer with 2.5+ years of experience testing banking, insurance, and enterprise applications. Owns QA end to end on projects: test planning, test case design, SIT, UAT support, regression, API, and performance testing, with defect management in Jira. Currently building test automation with Playwright and Bruno, and works with AI tools (Claude Code, GitHub Copilot) under clear rules to speed up repetitive QA work while keeping the test decisions.

TECHNICAL SKILLS

Testing	Test planning, test case design, manual testing (web and mobile), functional, regression, exploratory, SIT, UAT, API testing, performance testing, defect management
Automation	Playwright, Bruno, Selenium, Serenity BDD, Cucumber, Rest Assured, UFT One, Appium, JMeter
Tools	Jira, Postman, Swagger, Grafana, Git, GitHub, GitHub Actions, IntelliJ IDEA, Gherkin
Languages	Java, Python, SQL, Lua
AI tools	Claude Code and GitHub Copilot for drafting test cases, automation scripts, and documentation, with every result reviewed
Strengths	Requirement analysis, business process validation, cross-functional collaboration, problem solving

EXPERIENCE

Astragraphia Information Technology | QA Software Engineer Oct 2025 – Present

Project: Manulife Insurance – EBClick Apr 2026 – Present

- Own QA for the project as the independent tester: test planning, test case design, test execution, and defect validation.
- Design and run test cases for insurance web applications and their business workflows.
- Perform API testing, SIT, UAT support, and regression testing.
- Run performance tests with JMeter to check stability, response times, and behavior under different workloads.
- Report, track, and verify defects in Jira, and work directly with business analysts, developers, and stakeholders on release quality.

Project: Toyota Astra Motor (TAM) – Employee Self-Service Oct 2025 – Apr 2026

- Created and ran test cases for an Employee Self-Service (ESS) platform that integrates attendance, employee claims, company news, and employee service modules.
- Performed SIT, UAT, regression, and exploratory testing across multiple business modules.
- Developed and maintained automation test scripts with UFT One.
- Monitored and analyzed API performance in Grafana, including response times, concurrent users, and peak activity.
- Validated business requirements with business analysts, developers, and stakeholders, and managed test documentation and defect tracking in Microsoft Excel and Microsoft Forms.

Nawa Data Solutions | Quality Assurance Engineer Feb 2023 – Aug 2024

Client: CIMB Niaga – Banking E-Procurement System

- Created and maintained test cases for e-procurement modules: vendor management, purchase request (PR), purchase order (PO), tender and bidding, approval workflow, budget, contract, invoice, and payment processing.
- Executed SIT, regression, and exploratory testing to validate end-to-end procurement processes.
- Validated complex workflows with multi-level approvals, procurement lifecycle rules, and business rule compliance.
- Analyzed requirements and identified defects together with business analysts, developers, and stakeholders.
- Tracked and verified defects and reported test progress in Jira and Google Workspace, as part of the QA team for an enterprise banking application.

AUTOMATION PROJECT

Portfolio Test Suite | fattahwg.github.io 2026

- Built a Playwright suite (end-to-end, accessibility with axe, and phone layouts on desktop and mobile profiles) and a Bruno collection for HTTP checks.
- Both suites run in GitHub Actions on every push, a failing test blocks the deploy, and the latest reports are published with the site.

EDUCATION

Tarumanagara University | Bachelor of Computer Science (S.Kom.), Jakarta

2018 – 2022

CERTIFICATION

Quality Assurance Engineer Bootcamp | Alterra Academy

2022

ADDITIONAL EXPERIENCE

KeiNime | Web Administrator (Freelance)

Aug 2022 – Feb 2023

- Maintained website performance, resolved plugin issues, and managed content updates.

Badan Pusat Latihan PB HMI | Web Developer (Freelance)

May 2022 – Aug 2022

- Developed and maintained a web-based training management platform.

MADANI Hotspot | Network Engineer (Self-Employed)

Sep 2021 – Jan 2022

- Planned the network topology, and handled router configuration, installation, and maintenance.

Computer Center, Tarumanagara University | Web Development Intern

Jan 2021 – May 2021

- Assisted in web application development and maintenance with PHP, JavaScript, SQL, and .NET Framework.

LANGUAGES

Indonesian (native) · **English** (professional working proficiency)

INTERESTS

Software quality engineering, test automation, performance testing, game development, and continuous learning.

SIDE PROJECT

Lawak Studio | Studio Director, Roblox game development

2025 – Present

- Lead small Roblox game projects: start game ideas, set the direction and player experience, and plan features.
- Coordinate programmers, level designers, and 3D artists, and review gameplay flow and level design.
- Build gameplay systems and UI flow hands-on in Luau, such as interaction and carry systems.
- Run playtests and iterate on player feedback.
- Published games (Lawak Gamehouse on Roblox): *Become a Ghost Expedition*, *Lawak Obstacle*, *Gunung Lawak*, *Desa [Voice Chat]*
